

HOW TO UPLOAD WEBSITE CONTENTS via FILE MANAGER

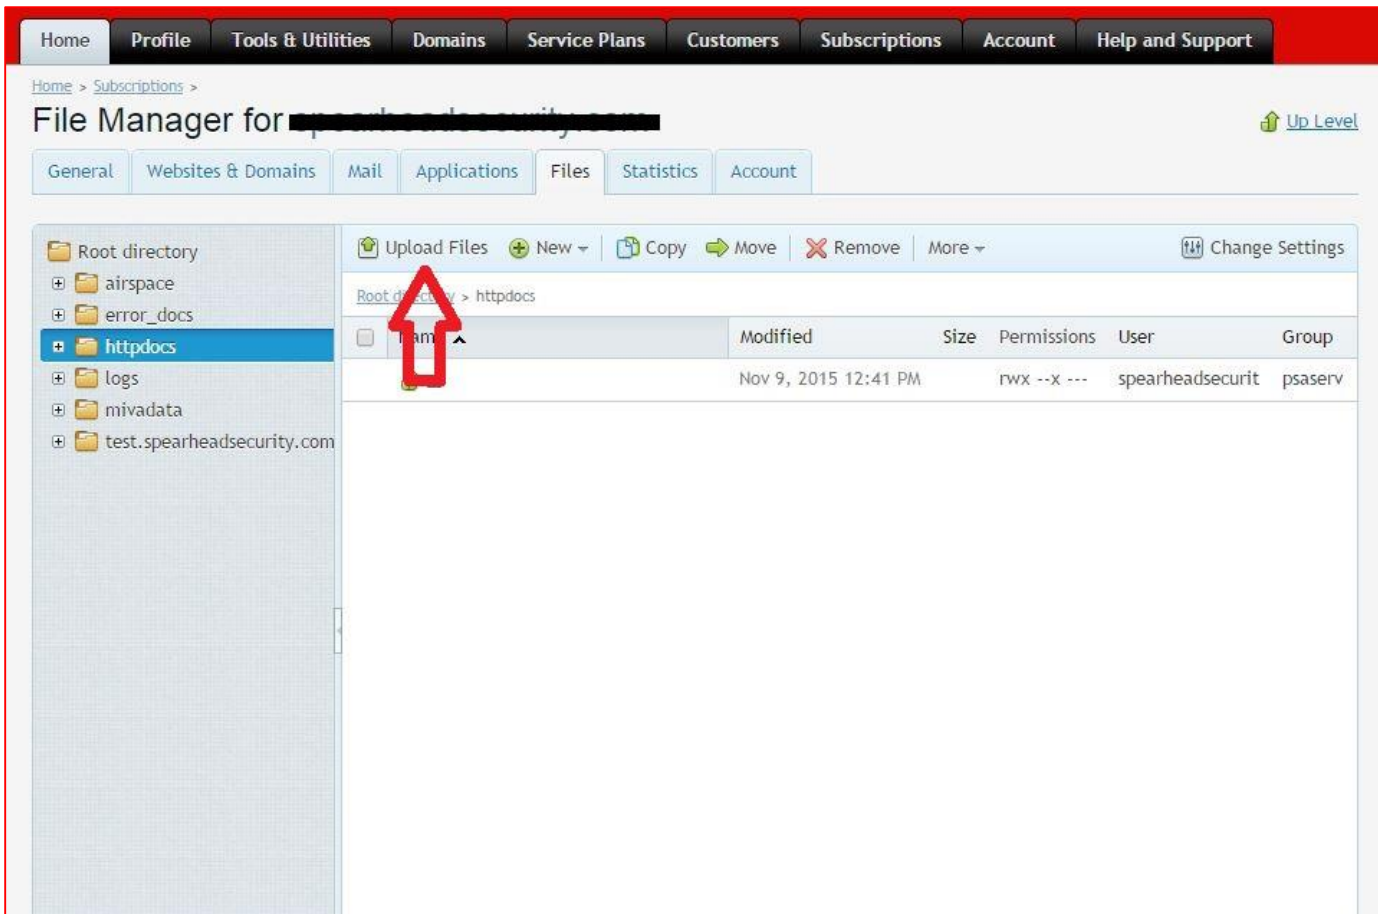

- >> Login to your Pangalan account control panel URL:
<https://mypanel.pangalan.com/cp>
- >> Choose your Hosting Account (PN Sakto / PN Laki)
- >> Under **Home** tab → Click **Manage Hosting** link

- >> Navigate to **Website and Domains** tab
- >> Click **File Manager**

The screenshot shows a web hosting control panel interface. At the top, there is a navigation bar with tabs: Home, Profile, Tools & Utilities, Domains, Service Plans, Customers, Subscriptions, and Accounts. Below this, the breadcrumb path is 'Home > Subscriptions > spearheadsecurity.com'. A secondary navigation bar contains tabs: General, Websites & Domains, Mail, Applications, Files, Statistics, and Account. The main content area starts with the text 'This is where you set up and manage websites.' followed by buttons for 'Add New Domain', 'Add New Subdomain', and 'Add New Domain Alias'. Below this is a section for 'spearheadsecurity.com Hosting Settings', showing website details like 'Website at httpdocs/' and 'IP address: 209.54.49.222'. A row of action links includes 'Open', 'Preview', 'Suspend', 'Disable', and 'Description'. A secondary row contains 'File Manager' (with an 'Open Site' button), 'Databases' (with 'Add New Database' and 'Select Existing Database' options), and a 'Show Less' button. The bottom section features a grid of icons and links for various services: Web Hosting Access, FTP Access, Hosting Settings, PHP Settings (version 5.3), Web Server Settings, Launch Presence Builder, Applications, File Manager (highlighted with a red box), Web Statistics, DNS Settings, Mail Settings, Secure Your Sites, Password-Protected Directories, Logs, and Web Users.

>> Either click **Upload Files**

>> then select the file to upload from your machine / computer.
