

## HOW TO CHANGE WEBSITE HOSTNAME (DOMAIN)

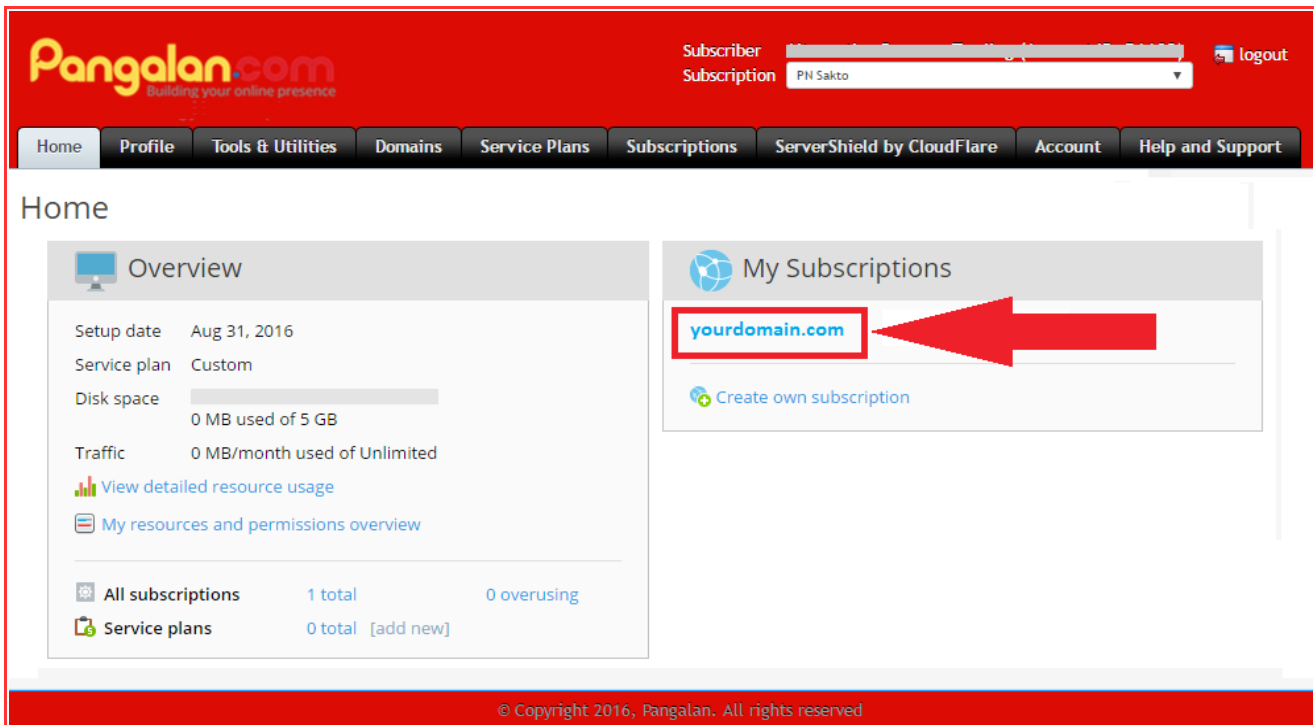

>> Open your control panel form the following link using the email address you have used upon registration and the password you have inputted.

URL: <https://mypanel.pangalan.com/cp/login.cgi>

>> Once login → Click on the **Subscription** drop down and choose **PN Sakto/ PN Laki**

>> On the **Home** tab → Click on **Your Domain Name**

>> From your Web Hosting **Management** area under **Website & Domains** tab → locate and click on **Hosting Settings**

The screenshot displays the Pangalan.com web hosting management dashboard. At the top, the logo 'Pangalan.com Building your online presence' is on the left, and the user's account information, including 'Subscriber' and 'Subscription' details, is on the right. A navigation bar contains tabs for 'Home', 'Profile', 'Tools & Utilities', 'Domains', 'Service Plans', 'Customers', 'Subscriptions', 'ServerShield by CloudFlare', and 'Account'. Below this, a breadcrumb trail shows 'Home > Subscriptions'. The main content area is titled 'yourdomain.com' and features a sub-navigation bar with 'Websites & Domains', 'Mail', 'Applications', 'Files', 'Databases', 'Statistics', and 'Account'. A message states 'This is where you set up and manage websites.' Below this are buttons for 'Add Domain', 'Add Subdomain', and 'Add Domain Alias'. The main section shows a card for 'yourdomain.com' with details like 'IP address: 209.54.49.160' and 'System user:'. A red box highlights the 'Hosting Settings' link. Below the card are three options: 'Presence Builder', 'Applications', and 'Custom Website'. On the right, a sidebar contains links for 'Backup Manager', 'Databases', 'Scheduled Tasks', and 'ServerShield by CloudFlare'. At the bottom right, a 'Hosting' summary panel shows 'IP address: 209.54.49.160 (shared)', 'System user: gls8282', and a 'Change Hosting Settings' link.

- >> Modify your Host name from the → **Domain Name** area #1.
- >> Click **Apply** button to update and save your changes #2.
