

## HOW TO CREATE NEW DNS RECORD

### Things to do:

- Request your Name Server information from your Hosting Provider  
Example are as follows:
- Pangalan.com Name Servers:  
**NS1: Phns1.pangalan.com – 209.54.54.253**  
**NS2: Phns2.pangalan.com – 209.54.55.247**

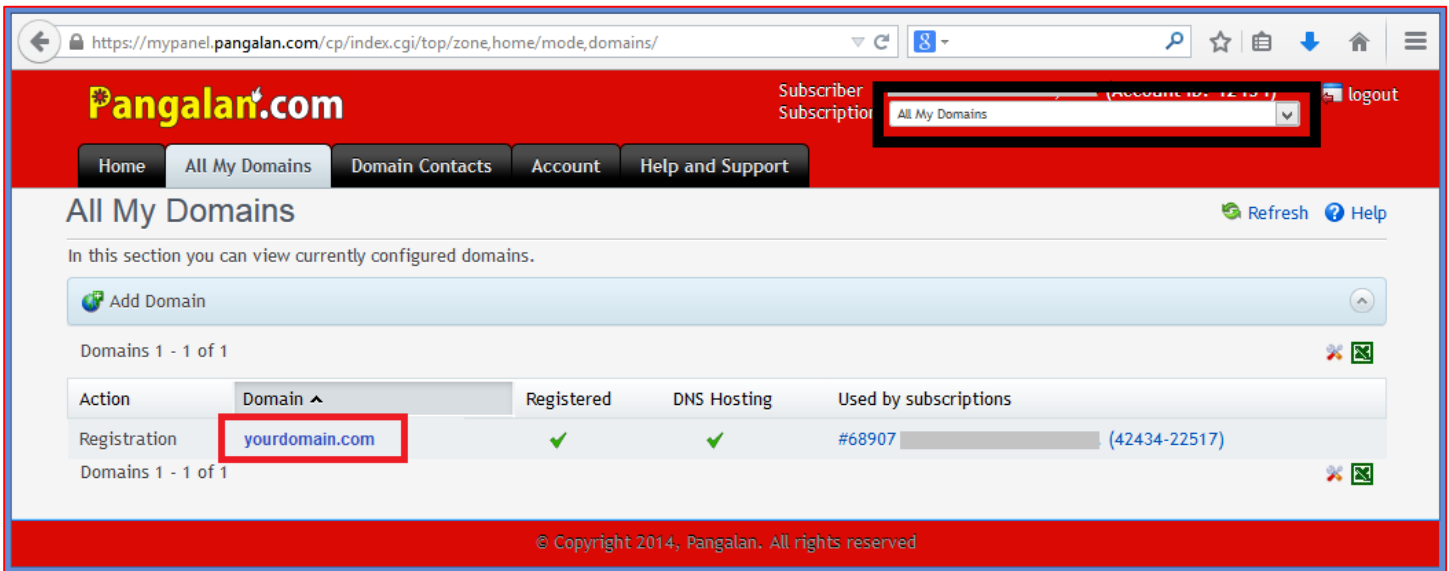

### How to Setup:

>> Log-in to your Pangalan account: <https://mypanel.pangalan.com/cp>

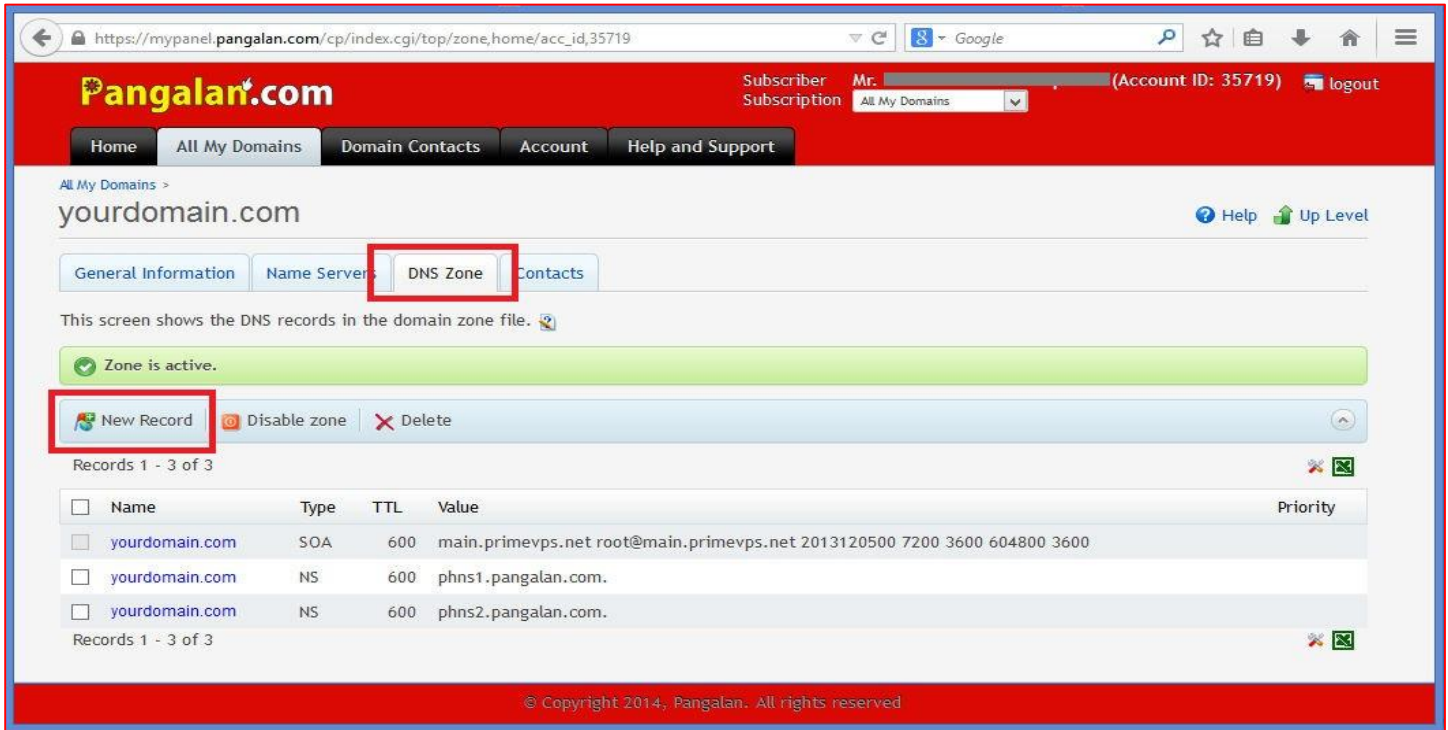

>> Make sure that you are in **ALL MY DOMAINS** subscription from the dropdown.

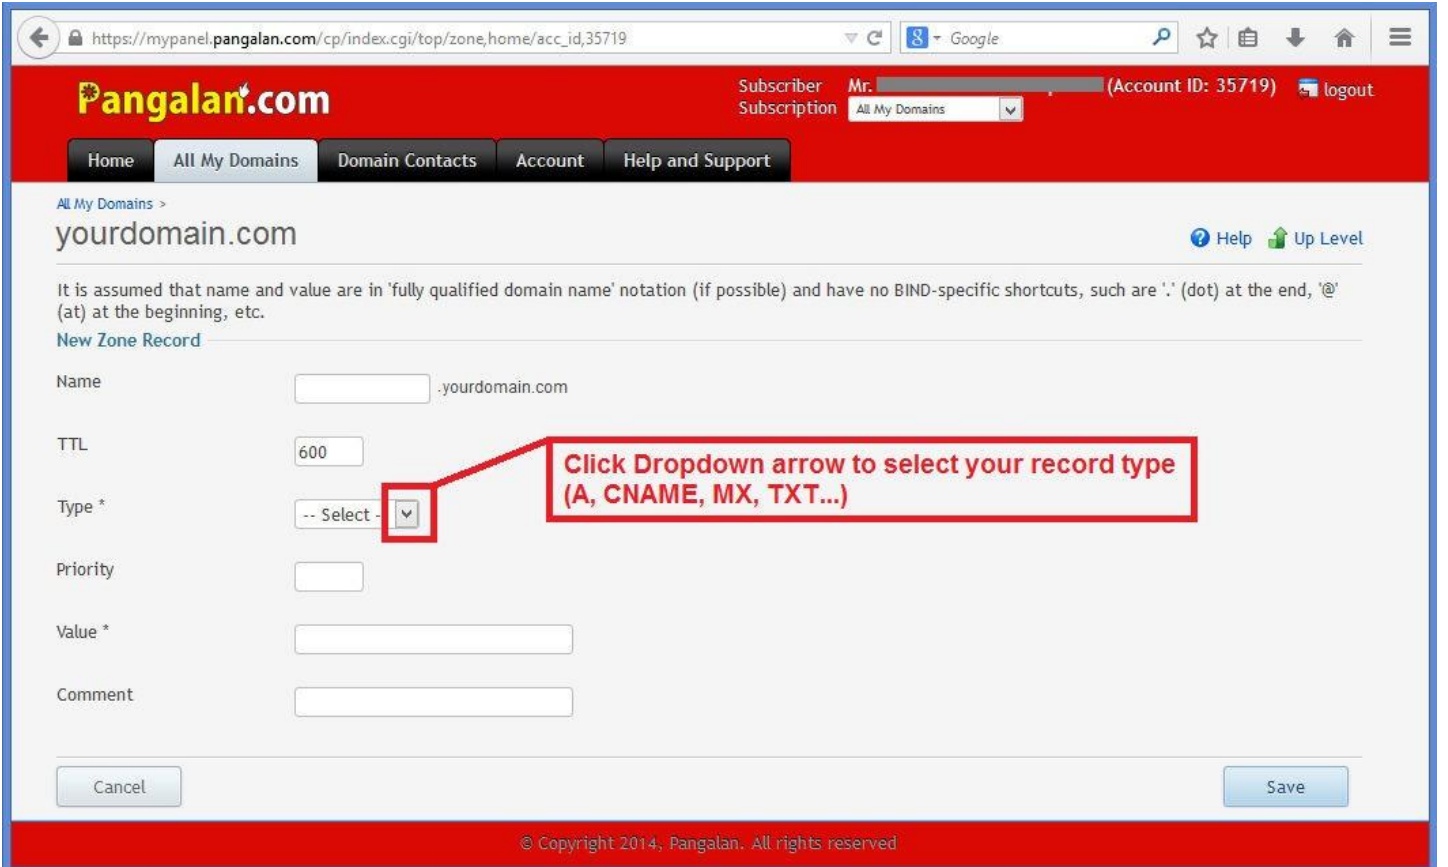

>> Click **YOURDOMAIN.COM**

>> Naligate to **"DNS Zone"** tab, then click to add **"New Record"**.

>> Supply your Record type details provided by your Hosting provider, click save to finish.

\*\*\*NOTE\*\*\*

It takes at least 8 hours to propagate the changes to name servers around the world. You should always allow a minimum of 24 hours for Name Server changes to fully take effect.
